Acknowledgments

Leadership for this conference was provided by Dr. George S. Libey, Associate Professor, Department of Fisheries and Wildlife Sciences, Virginia Polytechnic Institute and State University.

The planning committee would like to thank the authors for their diligence in submitting their papers early enough so that these proceedings could be distributed at the conference. Speakers were selected based on their experience and practical knowledge in commercial-scale recirculating aquaculture.

Special thanks are extended to Ms. Terry Bakestraw for her dedicated effort in preparing the conference proceedings. Without her assistance, this publication would not have been possible. The Planning Committee is appreciative of the contributions made by Mr. Geoffrey Knobf for his assistance in the development of this publication.

Finally, the Planning Committee expresses their thanks for the firms that provided financial support of the program and those that participated in the trade show. Without their participation, this program would not have been possible.

The conference was sponsored by Virginia Tech's Commercial Fish and Shellfish Technologies Program and Division of Continuing Education; the Virginia Sea Grant College Program; the U.S. Department of Agriculture; the American Fisheries Society, Virginia Tech Chapter; the Aquacultural Engineering Society; the Freshwater Institute; the Aquaculture in the Mid-Atlantic, and the Virginia Cooperative Extension.

Planning Committee

Dr. George S. Libey, Associate Professor, Department of Fisheries and Wildlife Sciences, Virginia Polytechnic Institute and State University

Dr. Michael B. Timmons, Professor, Department of Agricultural and Biological Engineering, Cornell University, and Member—Board of Directors, Aquacultural Engineering Society

Dr. George J. Flick, University Distinguished Professor, Department of Food Science and Technology, Virginia Polytechnic Institute and State University

Dr. Stephen A. Smith, Assistant Professor, Department of Biomedical Sciences and Pathobiology, Virginia Polytechnic Institute and State University

Dr. Stephen T. Summerfelt, Research Engineer, The Conservation Fund's Freshwater Institute, Shepherdstown, West Virginia

Dr. Thomas Losordo, Associate Professor, Department of Zoology, North Carolina State University, Raleigh, North Carolina

Conference Financial Sponsors

- Southern States Cooperative
- Perdue Specialty Feeds
- Keeton Industries, Inc
- Water Management Technologies
- Aqua Ultraviolet
- Upscale Water Technologies

To simplify information, trade names have been used in this publication. No endorsement of named products is intended, nor is criticism implied of similar products that are not mentioned.
Proceedings of The Second International Conference on Recirculating Aquaculture

Hosted by Virginia Polytechnic Institute and State University
Roanoke, Virginia
July 16 - 19, 1998

Edited by
George S. Libey
Associate Professor
Department of Fisheries and Wildlife Sciences
Virginia Polytechnic Institute and State University

Michael B. Timmons
Professor
Department of Agricultural and Biological Engineering
Cornell University
and Member - Board of Directors
Aquacultural Engineering Society

Designed by Christopher G. Libey

**AES TECH SESSION 1 - Feeds for Recirculating Aquaculture System**

| The Importance of Feed to the Economic Success of the System | 270 | Todd F. Powless |
| Digestibility Issues of Feeds for Water Recirculating Systems | 274 | Mark W. LaVorgna |
| Selection of Pelleted, Expanded and Extruded Feeds | 279 | Bob Robinson |
| Formulating Feed for Tilapia Reared in Recirculating Systems | 283 | Paul D. Maugle and J.M. Fagan |

**AES TECH SESSION 2 - Biofiltration**

| Biological Filters: Trickling and RBC Design | 291 | John N. Hochheimer and Fred Wheaton |
| Application of Fluidized-Sand Biofilters to Aquaculture | 342 | Michael B. Timmons and Steven T. Summerfelt |
| Comparative Performance of Biofilm Reactor Types: Application of Steady-State Biofilm Kinetics | 355 | Barnaby J. Watten, Michael B. Timmons, Brian J. Vinci, and Steven T. Summerfelt |
| Immediate and Stable Nitrification in Biofilters by Microbial Manipulations | 359 | Ami Horowitz and Sarah Horowitz |

**AES TECH SESSION 3 - Volunteer Papers**

| Growth of Mercenaria Seed Clams in a Recirculating Nursery System Utilizing Computer-Control and Fluidization Technology | 368 | Timothy J. Pfiiffer and Kelly A. Rusch |
| Fish Health Management of Recirculating Systems | 369 | David Crosby |
| Application of Industrial Monitoring and Control for an Experimental Carbon Dioxide Stripper in a Recirculating Aquaculture System | 371 | Scott M. Tsukuda, James M. Ebeling, and Barnaby J. Watten |
